T98 cells

A172 cells

Cell number/well

cell lines: T98 and A172

Tumour cell lines were treated with various concentrations of TMZ and LEV for 72 hours. The number of cells in each treatment group was counted and compared to the control group.

Key:
- *: p < 0.05
- **: p < 0.01
- ***: p < 0.001

Comparisons were made between the treated groups and the control group using statistical tests.
